PROJECTS

Text Editor
• The Text Editor project is built using Java and Swing GUI components.
• It allows users to create, edit, and save text documents.
• The application features a user-friendly interface for basic text editing task like text formatting.
• The project highlights the use of Java for creating desktop applications with a focus on simplicity and ease of use.

Personal Portfolio
• The Personal Portfolio is a personal website built with HTML5, CSS3 and JavaScript to display skills, and projects.
• It has a clean, responsive design that works well on different devices.
• This project shows the use of HTML5 for website structure and CSS3 for styling, and JavaScript for adding dynamic features like form validation, and demonstrating front-end development abilities.

TECHNICAL SKILLS

• Programming Languages: Core Java, SQL
• Web Development: HTML5, CSS3, JavaScript
• Database: MySQL
• Operating System: Windows, Linux
• Version control: GitHub
